

EnviroSim Europe offers 2 days in Bordeaux:

BioWin Course

Tuesday-Wednesday June 8-9, 2010 (9h - 18h)

Two day hands-on training course for maximum 12 people with the following objectives:

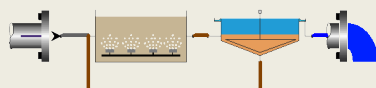

- Learn to use **BioWin** and understand process **modelling** principles
- Review biological **nutrient removal** technologies and their modelling methodology
- Cover **influent fractionation**, aeration, settling and other topics
- Perform steady-state and dynamic **simulations**
- Learn advanced BioWin topics, **including anaerobic digestion, pH modelling and chemical precipitation**, as well as **sidestream** treatment options
- Design and optimize whole treatment plants using **BioWin**
- Get **answers** to all your process modelling or BioWin questions from the experts

Cost

Two day « **BioWin Course** »: 600 € (+VAT if applicable) per person
